

Heat network consultancy, reimagined.

Smart, structured, and refreshingly simple. Insite Consultancy helps you get more from your heat network through a flexible three-step journey. Choose what you need, when you need it.

1. REPORT

Understand your network from the inside out

You can't fix what you don't know. We give you a clear, actionable picture of your heat network's current set-up and performance, and how you can improve on it.

Why it helps

Uncover hidden inefficiencies, and the costs they cause.

See where you stand on regulations, and what to do next.

Find the blind spots in your set-up.

Set a strategy based on facts.

What you'll get:

- ✓ Desktop review
- ✓ Site survey
- ✓ Efficiency report

- ✓ Metering report
- ✓ Itemised next steps

2. MODEL

Your network simulated and stress-tested

Upgrades are an investment. Test them before you commit. With a digital twin of your heat network, we help you explore 'what ifs' and avoid 'wish we hadn't's'.

Why it helps

Run future scenarios without future regrets.

See what works before committing time and money.

Cut the risk and the rework.

Build a case your board can't ignore.

What you'll get:

- ✓ Digital twin
- ✓ Scenario simulation

- ✓ Works validation
- ✓ System design checks

3. MONITOR

Because performance isn't set and forget

Just because your heat network's running doesn't mean it's running at it's best. Monitor keeps you connected with smart alerts, clear updates and plain-English advice.

Why it helps

Stay in the loop with what's really going on.

Spot issues early and act fast.

Turn data into improvements.

Cut through the noise with clear insights.

What you'll get:

- ✓ Metric tracking
- ✓ Intelligent alerts

- ✓ Monthly reporting
- ✓ Improvement plan

Not your average heat network. Not your average consultancy.
