

A VANTAGE point for your metering & billing data

Say goodbye to spreadsheet overload with VANTAGE. Insite Energy's free client portal helps you track the metering & billing performance across your heat network portfolio, without the chaos.

WHAT YOU GET

Everything you need in one place

VANTAGE brings together the tools and insights housing providers and property managers need to stay ahead without the admin overload. From live data to downloadable reports, it's all built to make your job easier.

ABOUT VANTAGE

Your heat network metering & billing made easy

VANTAGE gives you a clear, real-time view of your metering & billing data across all your heat networks served by Insite. From meter health to payments, it's built to help heat suppliers stay proactive and in control.

Why it helps

View performance filterable by network and date ranges.

Instantly spot issues through RAG¹ dashboard.

Identify faulty or offline meters before issues arise.

Download data & documents to support operations.

Share access to your heat network data across your team.

Track resident payments & credit control progress.

See energy usage split by PAYG & credit billing.

Monitor PSR² & self-disconnection metrics.

CASE STUDY

117% more accurate bills through smarter meter management

Faced with inaccurate billing, our client recognised the need for a data-led approach.

Using VANTAGE's 'Meter health' dashboard, we identified meters that were faulty or disconnected and built a targeted solution: remote fixes where possible, recalibration for underperforming meters, and emergency repairs for critical faults.

Within 12 months, 70% of faults were resolved and 10% of meters were recalibrated across the estate. Bills based on actual readings rose from **33.8% to 73.5%**, boosting accuracy, cash flow, and trust.
